

# The Organisation As A System

## **The Old Geek**

*Structured Coherent Design*

### 15. Document Management – Key Players

# 15. Document Management – Key Players

The slide deck set:

- [1. Introduction](#) – document management, why do it

## The Operating Environment

- [2. Document Life Cycle](#)– Documents have lives of their own...
- [3. The Building Blocks](#) – Its all about the architecture
- [4. Documents Are Packages](#) – Document files have form, function and purpose beyond just the content
- [5. Legal Considerations](#) – You are all international lawyers now
- [6. Infrastructure](#) – You need to find a home, one that is safe.....
- [7. Meta Data.](#) “Data” about data.

## The Architecture

- [8. Naming Convention](#) – Privacy by design starts here
- [9. Document Design](#). If there is a requirement to tap into documents for data analysis purpose.. They must be designed.
- [10. Corporate Dictionary](#) –Not as many words as you think
- [11. Location](#) – Location, if you do not know where something should be, it may as well not be there!
- [13. The People](#), the Culture (this deck) – People do what people do. Writing with Style.
- [14. The Tool Architecture](#) – No one tool can cover it all and cookies? They don't count.

- [15. Security](#). You can't ignore it
- [16. Closing Summary](#) - Wrap up..

# 15. Document Management – Key Players

## About the Author:

- Allen Woods, recently retired.
- Ex British Army (1971 – 1995) Taught Arctic Warfare, Several Years On Operations, Self funded through College to Study IT
- Chartered Member of the British Computer Society for 20 years
- Member of the Chartered Status Interview Panel for BCS
- In 2010, Finalist of UK “Developer Of The Year” Competition for HSIS
- Primarily Employed in UK Defence Supply Chain and Logistics IT since 1995 until 2019
- Credits: MoD Health and Safety Information System, Various Internal to Defence P&G Portals, CATMIS, IQB Oversight to Defence Voyager Programme IM Transformation

## Part 1 - The Enterprise Is The System

# 15. Document Management – Key Players

## The Organisation as a System

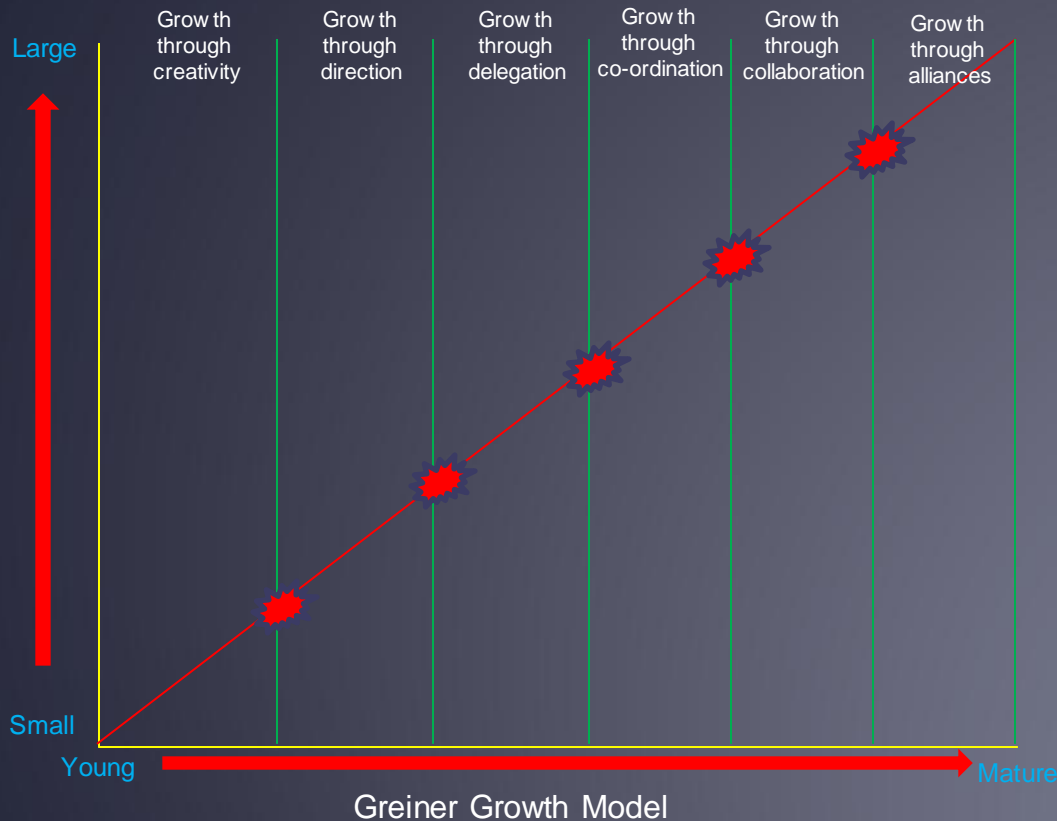

## Each do....

# 15. Document Management – Key Players

As the Organisation Grows...

As the organisation matures, so bureaucracy grows..

# 15. Document Management – Key Players

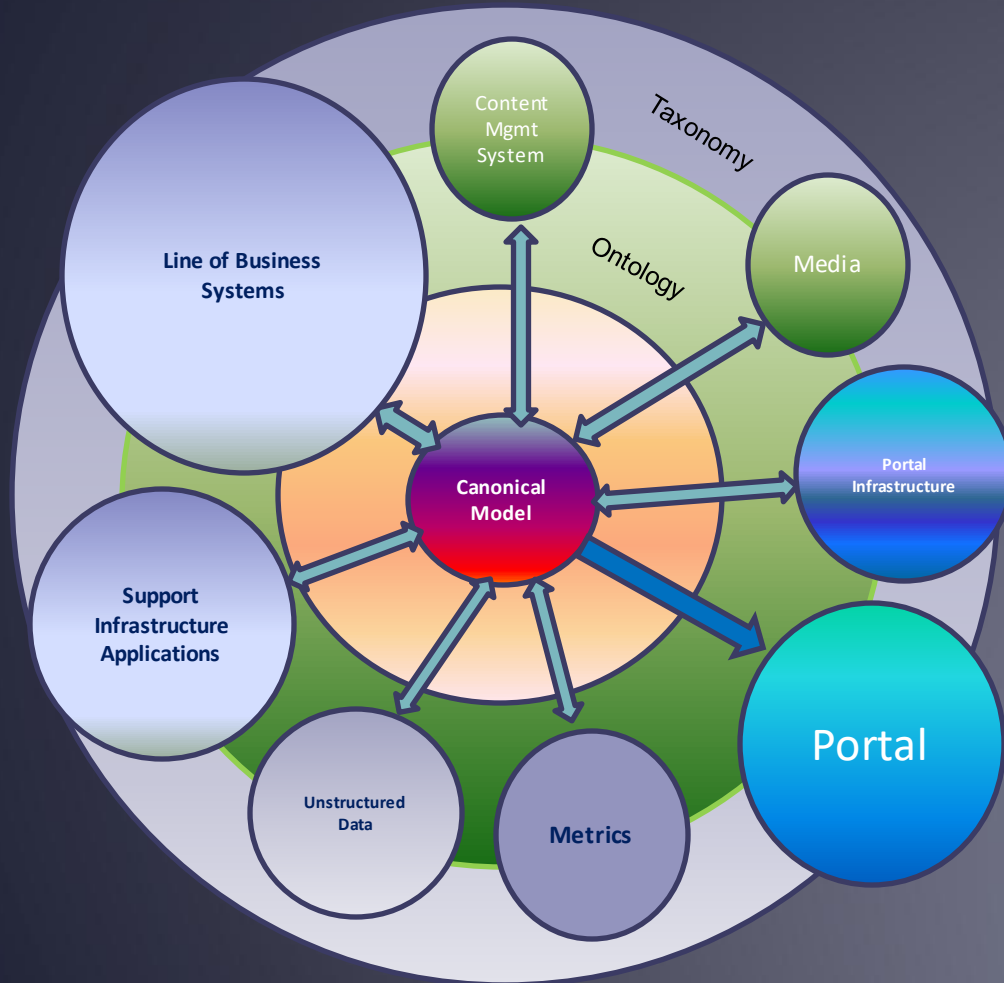

The Organisation Matures In Respect Of Capability

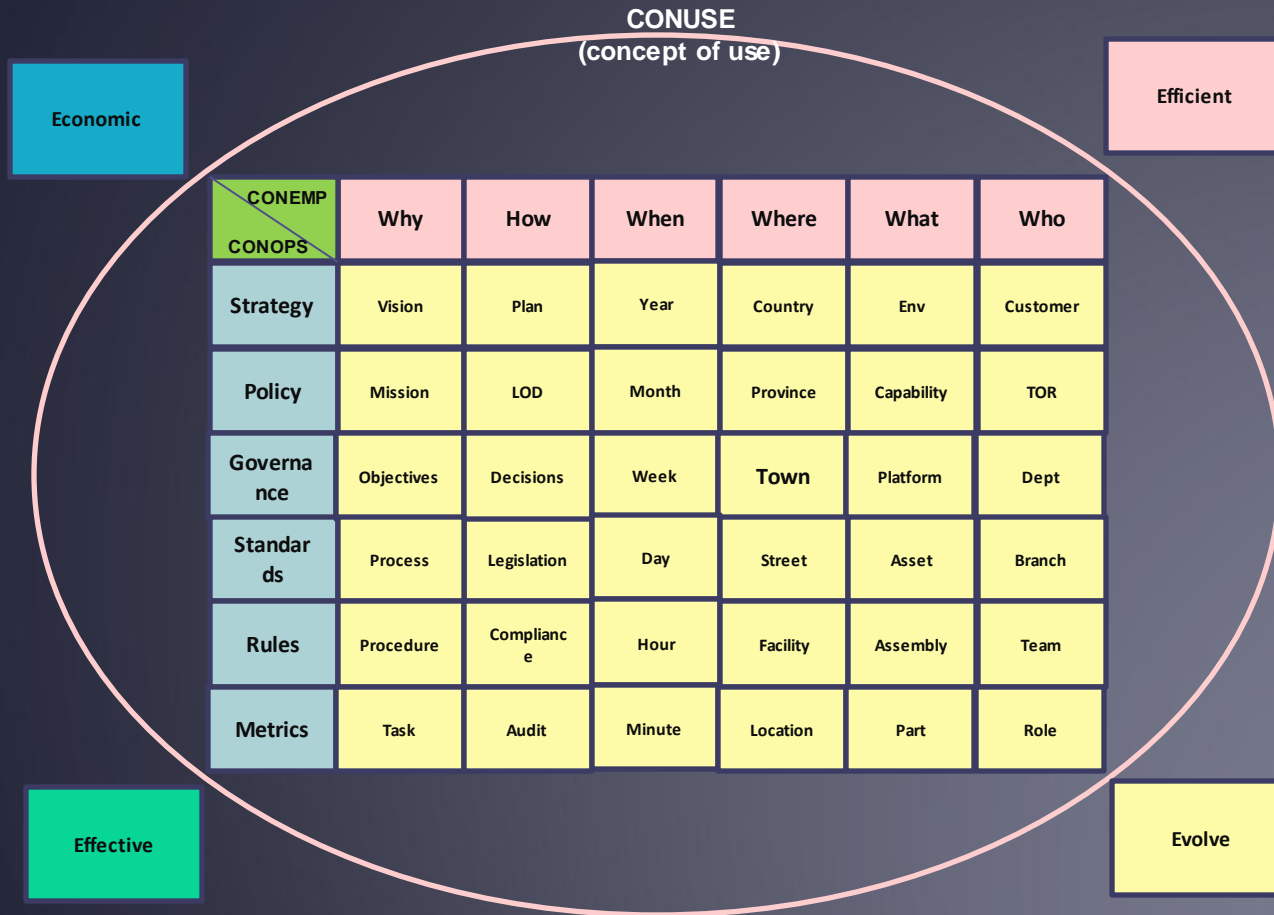

# 15. Document Management – Key Players

## Controlled Entry To The Dataverse

# 15. Document Management – Key Players

## Multi Perspective Gateways

# 15. Document Management – Key Players

Things, Relative to Each Other In Time and Space

Fractal like decomposition as the information requirement gets more specific

# 15. Document Management – Key Players

## Co-ordinated Lines of Development

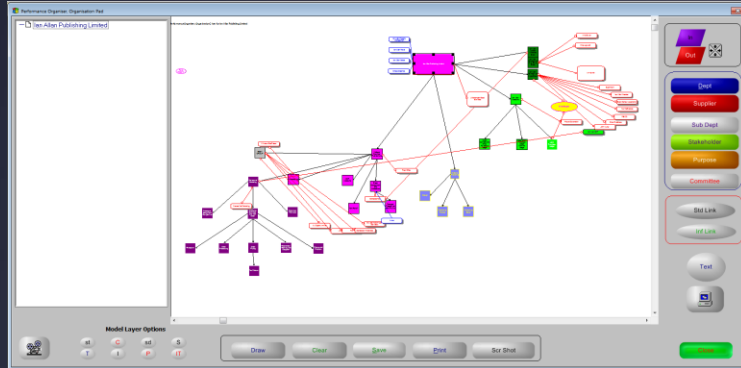

# 15. Document Management – Key Players

## Part 2 – Mapping the Enterprise

# 15. Document Management – Key Players

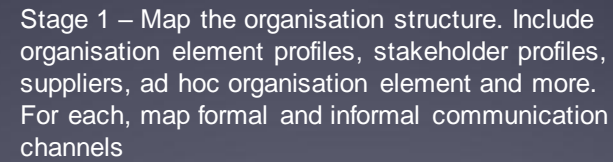

## The Organisation IS the System. Map Form, Function and Purpose

As part of the design effort to specify the role “Task Terms of Reference” (TTOR) for a variety of appointments and tasks, a digital organisation map was produced that:

1. Gave the means to map the relationships between an organisation's component parts
2. Provide the means to support “value stream” plotting in the form of graph schemas on a “start anywhere” basis
3. Subsequently, once a map had been completed, act as a change lever in its own right by providing the means to experiment with “fit” between “things” by altering connection pathways

# The General Mapping Method

Stage 3 – For each organisation element, create a process catalogue

Stage 5 – Map individual processes following any symbol form, applying the taxonomy “Process”

Stage 6 – Map interfaces between process steps and: Performance metric profiles, documents, individual roles, individual assets.

Stage 7 – Generate “start anywhere” graph schemas from any organisation element supported in the map (objectives, departments, processes, performance metrics, resource profiles etc) follow the path where it takes you

# 15. Document Management – Key Players

## The Architectural Benefit?

The organisation map provides “the glue”

That gives easily understood context to data transition and attenuation exercises from raw data to information

That provides the design foundation for multi perspective ontologically coherent gateways

That provides the basis for the design of a portal that facilitates the delivery of timely information that is contextually coherent

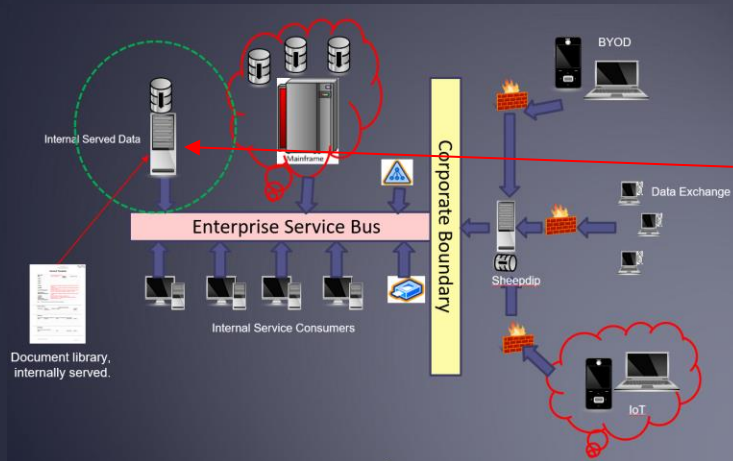

That can be presented on the basis of local information need

That gives decision making power to “the edge”

# 15. Document Management – Key Players

## Map Security

An organisation map, once produced and installed as part of a portal...

The map and portal in combination are highly sensitive and therefore should not be visible to third parties

Both the map and portal should be stored internally

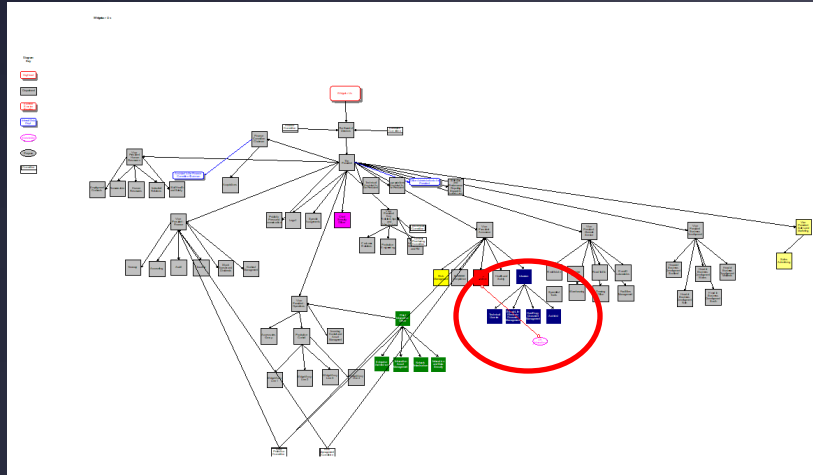

A map and portal combination are a change lever in their own right in that changes to the map, both in turns of map structure and content can be reflected immediately in the portal

A map and portal combination facilitate the concept of “living documents” in that authority to edit and amend text can be granted to subject matter experts in the various organisation elements contributing to map detail

A map and portal combination over time, reduce the administrative burden of maintaining documentation associated with compliance with quality assurance standards like (but not limited to) ISO 9000

# 15. Document Management – Key Players

## The Map Origins

*The key roles, mutually supportive, that influence the design of the document management regime were:*

*The Vice President Quality Assurance*

*The Librarian*

*The Data Protection Officer*

*Technical Asset Manager*

*You of course, may decide differently! The map provides the means to experiment...*

For this and other mapping exercises, a combination of organisation charts drawn from a variety of management science books were used to generate a “generic” organisation map.

In support of the organisation chart, several years ago free to download catalogue of:

A process catalogue

Associated business objective summary profiles

Key Performance Indicators

Were drawn from the US [AQPC](#)

The combination giving the means to build a generic model of an organisation structure with which to “play” with key roles related to data protection generally and position them in an appropriate manner. The management position of such roles, after a number of mapping iterations was to place them under “Quality Assurance” rather than technical.

Key deliverables during the positioning of both DPO and Librarian roles, recorded in the map included:

A role review case study

A role Task Terms of Reference (job description)

A role objective profile catalogue

A role process catalogue

A role performance metric catalogue

All available “on line” as living documents in the portal

The Old Geek

# 15. Document Management – Key Players

## Role Based Information Integration

Supported by:

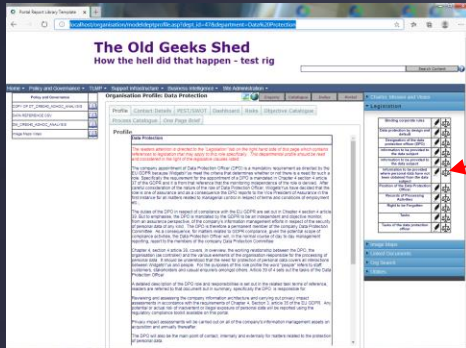

The means to cross reference clause specific legislation

Integrated performance reporting

Active “image maps”

And more...

With documents accessible from a central library managed and operated by the librarian on a “through life” quality assured basis..

The Old Geek
